

MFMG SPRING FIELD DAY

In partnership with Landmark and FAR Australia

Thursday 25th October 2018 – 1pm Start

Landmark-FAR Australia

485 Mt Hope Road, Rendelsham

SA Crop Technology Centre

1 pm Start	Registrations
	<p>Winter barley – does it have a place in regions with higher yield potential compared to spring germplasm? <i>Dr Kenton Parker, SARDI</i></p> <p>Winter barley is not a new crop but with a move to earlier sowing dates and a range of new European germplasm could that perception be changed. Dr Parker looks at the difference between winter and spring germplasm and its suitability for earlier sowing.</p>
	<p>2018 in season disease update. <i>Dr Hugh Wallwork & Dr Marg Evans, SARDI</i></p> <p>SARDI's highly regarded senior pathologists Hugh Wallwork and Marg Evans discuss the latest developments in cereal crop pathology covering wheat, barley and oats.</p>
	<p>Early sown wheat in the HRZ of SA – what are the key attributes for early sown wheat? <i>Nick Poole, FAR Australia</i></p> <p>Nick Poole discusses the management approaches that are most suitable for mid-April sowing dates and asks what characteristics we are looking for in a wheat cultivar sown at this time?</p>
	<p>Septoria tritici blotch control in wheat. <i>Tracey Wylie and Katherine Fuhrmann, FAR Australia</i></p> <p>Tracey Wylie and Kat Fuhrmann discuss the results of a GRDC funded project on <i>Zymoseptoria tritici</i> looking at the influence of fungicide application (timing and rates) for control of this pathogen and its interaction with genetic resistance.</p>
	<p>Challenging the yield boundaries of barley. <i>Amanda Pearce, SARDI and Michael Straight, FAR Australia</i></p> <p>Amanda Pearce and Michael Straight discuss the key elements of barley management in a first cereal rotation position using the MFMG funded research trial at the centre as a platform for discussion.</p>
5.00pm	<i>Please join us for dinner & networking event</i>

Please RSVP by 19th October – www.mackillopgroup.com.au
